

XS-460-500-540

- These craft all share the same design and are based on variable V-hull forms with a high sheer bow, generous overall beam and substantial 50cm tubes.
- The *XS-Value* craft comes with a centre console and there are several different seating options available. We also offer a wide selection of metal work, A-frames, diving cylinder racks, tow posts, screens, extra protection to the tubes, overall and console covers as well as packages of boat motor and trailer.
- These craft are ideally suited to many roles, the *XS-460* is widely used as a Sailing Club Rescue Craft and an ideal entry level family sports boat. As you move up the range the *XS-500* with its longer hull length suits use at sea and this makes it an ideal 'private' dive boat as well as a sea going Club Rescue craft and family sports boat. The variable V-hull gives excellent grip in the turn on calm water as well as a soft ride in the rough.
- The *XS-540*, the longest hull length in the 2.2m beam range, provides an ideal craft to start cruising with and sufficient deck space to fit a substantial amount of seating. As with all craft in this range it is important to have the right engine. Please do not hesitate to contact us to discuss the best combination of craft and motor to suit your needs.

XS-550

- This variable deep V-hull craft with a high sheer bow and substantial 2.6m beam offers a stable craft, ideal for diving, cruising and rescue work.
- The deep V-hull and substantial beam give this craft excellent performance with motors of 75hp and larger.
- We offer a wide range of accessories and seating options. Please contact us for details.

XS-600

- As the hull length increases the available deck area for seating or payload increases significantly. A longer hull will often give better sea keeping as well.
- The generous beam and substantial tubes combined with the increase in hull volume allow larger and heavier motors to be fitted to the craft.
- A 6m boat is ideal for extended cruising as adequate seating and sufficient fuel capacity can easily be accommodated.
- We offer a wide range of accessories and seating options. Please contact us for details.

XS-650-700

- These are the longest craft in our 2.6m beam range and share all of the rough water features of their smaller cousins - Deep variable V-hull, high sheer bow, generous 50cm tubes.
- With a huge internal deck space, seating combinations for up to 12 people are possible. We have these models certified to MCA for passenger and work boat use and they also offer a superb platform for extended off-shore cruising with the family.
- We offer a wide range of accessories and seating options. Please contact us for details.
