

XS-360 Open Rescue Boat

XS are a leading UK manufacturer of commercial Rigid Hulled Inflatable's. The Rescue Boat range of 4.6-5-5.4 m are widely used as beach rescue and support craft by a variety of commercial holiday and instructional operators as well as being found at numerous sailing federations and local authority sites.

XS have identified a niche for a "portable" open sub 4 m Rib that is robust enough to operate in a harsh beach environment and perform safely with a 8-15 hp tiller steered engine. These craft share many attributes of the larger commercial XS craft, a comparatively high sheer bow, Deep V hull yet maintaining tube contact with the water to give stability at rest and at speed. Detail is paid to durability with reinforced tube transom joins, substantial handles placed in a manner that allows the craft to be lifted, tube mounted paddle holders a double skinned, non slip deck, substantial rear well and bailer tube, double skinned helm seat area and robust lifelines. Stainless steel bow eyes and transom U bolts are fitted as standard. The craft is supplied with a Robust Foot Pump and users manual.
